

Neighborhood Update

Good Afternoon neighbors.

I have been in contact with our Osceola County inspectors regarding the work that has been going on over the past few days. According to our inspectors, they were never notified of this work, so they could not notify us -and in turn, notify you.

Mike, one of our inspectors, visited the site today and spoke with Chris from AT&T. AT&T informed him that their crews will be working within the community for approximately two weeks to install utility lines. They advised that any damage resulting from the work will be repaired upon completion.

Once the installation is complete, the County will conduct an inspection to identify and address any issues related to the project.

I encourage you to take photos of any damage and report to Osceola County. Thank you for your patience.
